

Coolidge Math Month

"Math is Cool"

Math Month is upon us! Throughout the month of February, children are being encouraged to practice their fact fluency and math skills. Each week, students will learn a new math game at school. Students will bring a hard copy of the game home each Friday. They are encouraged to teach it to their family and play it at least once at home throughout the week. Playing multiple times will only strengthen their math concepts. Materials such as dice will be sent home with your child. Please keep track of the materials and return them to school at the end of February. Teachers will be planning some fun and educational math activities each week as well. Thank you for supporting the learning that is taking place in school. Enjoy Math Month!

Weekly Spirit Days (every Friday):

Week #1- February 3rd

Week #2- February 10th

Week #3- February 17th

Week #4- February 24th

Wear a number or team jersey

Patterns day
