This means you should arrange your objects on a table in an interesting way. Not all in a row like they are marching in a parade. Put some in front of others to show space. Draw them lightly using basic shapes and forms. Add value/shading including light side, dark side, highlight and shadow. If you want to challenge yourself and add color go for it, but you should still be able to see a light side and dark side, different values in your object. I drew my breakfast.</p>

Reading for Learning (20 mins)
Focus on Fiction

Choose a fiction book from
[GetEpic](#) or home

Think about the text, describe the main character. What key details make you think that? You can write it down, tell someone in your home, or even to your pet!

[BrainPop on Character](#)

Music

Music activity for this week is:
Make a song up on your recorder.
Compose a song using the three notes that we have learned, B, A and G. Your song should have a beginning, middle and an ending. (3 sections) After you have the sections planned out, practice them and when you feel ready, share your song with someone in the house. Have fun
Don't forget a title for your song

Keep the music playing
Mr. Stromberg

Media

No Device: Pick a story/ book to read. Discuss if the main character/s faced a dilemma (problem in the story. Did the main character/s find a solution, if so what was the solution?

Have a device?: March is Women's History Month. Please use Pebblego or Pebblego Next to find a biography of a notable woman in our present or history. Discuss some of her accomplishments, obstacles, and/ or notable moments in her life? Did this individual have to show grit, integrity, other character traits in her life?

Reading for Learning (20 mins)
Focus on Fiction

Choose a fiction book from
GetEpic or home.

Retell the story you read to
someone in your home. You can
write it down, tell someone in your
home, or even to your pet!

[How to retell video](#)

Reading for Pleasure (20 mins)

- Read something you **WANT** to read
- Read before bedtime
- Read something that interests you from [GetEpic!](#),

• **Daily writing prompt:**

*Make sure to include all
the parts of a letter.*

**Write a letter to
someone older you care
about - maybe a
grandparent or a
neighbor?** Make sure to
let them know what
you've been up to and
ask them some questions.

Science

Germ Experiment Using Pepper and Soap(from
"YourModernFamily" website.

Gather these items:

- A small bowl of water
- Ground black pepper
- A small bowl of liquid soap

Steps:

- Sprinkle pepper on the top of the water
- The pepper represents germs like viruses that can make us sick
- stick one finger in the 'germs' and see that the "germs" got stuck on it.
- Then put a clean finger in the soap and swirl it around until it covers the end of your finger
- Next, put the soapy finger in the 'germs'

- The 'germs' should be repelled by the soap and should quickly move away from your finger.

What is a Germ?

A germ is any microorganism, especially one which causes a disease. Germs can be bacteria or viruses, as well as a few other types of microorganisms, too. They are EVERYWHERE.

How does soap get rid of germs?

It's important to realize that soap does not kill germs. Soap removes germs. The germs stick to the oil on our hands, and water will not remove it, so we need to use something else. Soap likes

				<p>water and soap likes oil, so it makes the perfect match!</p> <p>* “When you wash your hands with soap, the soap molecules act as a mediator between the water and oil molecules and bind with both of them at the same time. Then when you rinse everything off, the soap carries away the germs with the water. ” – lifescience</p>

Families,

Please make sure that your 4th Grader’s teacher has the biography feature for the yearbook. The PTA will be finishing our yearbook this week.
